FOREWORD

(Written by Andrew and Mark Williams)

The "Presingoll" Herd

The Presingoll Herd arrived at the farm 100 years ago, they were walked from Cogegoes Farm, Camborne all the way to St. Agnes when the family moved to Presingoll from Camborne. The herd was first registered Pedigree by our grandfather in 1950 following a period of grading up. South Devons were then a dual-purpose breed being used for milk and meat. The herd was milked by hand until a milk-line was installed with the milk bottled on site and sold on the local milk round.

Milking ended in 1967 with the herd changing to a double-suckling system, breeding for beef production was now the focus with heifers kept as replacements and steers sold primarily as stores. During the late 1960's and early 1970's bulls were bred for export to South America and to South Africa. Our father Roger continued to grow and improve the herd until following a sudden stroke and heart surgery the herd went through another change to a single-suckler system, split into spring and autumn calving.

After the loss of our father in 2001 the herd stood at 5 cows plus followers. We have grown the herd to its present level since, but ill-health and work commitments have prompted the decision to change farming policy.

SALE INFORMATION

- The cattle were all pre-movement tested on 12th September.
- ***The PD results stated are as at 22nd September.*** The cows were running with the South Devon stock bull "Z Polkinghorne King George 7" from 7th May for 20 weeks and since 12th September have ran back with the Blonde d'Aquitaine bull. The heifers are all in-calf to the Blonde d'Aquitaine bull having ran with him from 13th May for 19 weeks.
- The sale will take place immediately following the sale of Store Cattle at 1.00pm approx.
- All of the Cows and Calves will run into the ring as pairs but those with stronger calves being Lots 301 to 356 will be sold separately in the ring.
